

THRUSTER Layout

This is our current layout for a **THRUSTER** for a typical shortboard. This should be considered a starting point for your own designs. The side boxes should be moved forward or back as the length of the board changes. Cant angles - FRONT 6° or 8° depending on desired looseness.

We use a **G Square** for our fin layouts, so the fin base width is the standard 4.50" used on the square.
